

Your single-source solution for effective project delivery.

Keep your projects on task and on track with RedTeam... a comprehensive, web-based, eco-friendly collaboration and workflow solution for construction and facility asset management.

RedTeam empowers your team to deliver better service and higher quality at lower cost!

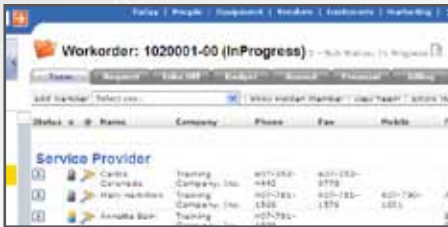

**Get organized. Be effective.
Stay on track.**

RedTeam Software enables you to automate and streamline the activities of your people, processes and vital project information. By leveraging the efficiency of collaborative media, RedTeam empowers your customer, employee, and vendor relationships, while providing your business unprecedented levels of control and accountability.

**You'll wonder how you ever
survived without RedTeam.**

Our structured implementation process is designed to minimize disruption of your business operations and make good use of the time invested by you and every member of your team. RedTeam Consultants are on hand and at your side to guide you along the implementation process and make your transition to using RedTeam expedient and seamless.

Reduce paper and minimize undocumented verbal communication.

Team Contacts

Stay in constant communication. Instantly access contact information for every member of your team, including customers, employees, vendors and third party professionals.

Scope of Work

Diligent control is essential to project success. Team Service helps you manage scope of work from the initial request for the proposal through final contract deliverables.

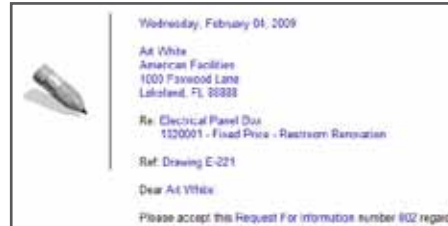

Change Management

Decisions and requirements can change. All project changes can be quickly and easily documented, directives issued to vendors, proposals issued to the customer, as well as track time and materials and invoicing.

Commitments

Mitigate risk for all parties involved in construction and facility asset management. Support vendor commitments as well as internal labor, equipment and miscellaneous expenses authorizations.

Dialog

All industry standard project correspondence is supported by RedTeam, including Letters, Meeting Minutes, Requests for Information (RFI) and Project Management reports.

Progress Reporting

Document progress of work using daily Progress Reports, milestone schedules and schedule updates, and monitor anticipated versus actual contract completion dates to set clear expectations.

Disbursements

Vendor invoices are routed electronically throughout the team. View original documents from any location, and enforce rules based on approval authority to maintain internal control.

Deliverables

Track every step from creation to request to approval. Manage and track items to be delivered pursuant to the contract, such as submittals, manuals, warranties and Lead certifications.

Billing

Invoices are among the most important documents for work in progress. Facilitate multiple billing methods, including industry standard commercial invoices, applications for payment and time and materials billing.

Embrace the future and call RedTeam to schedule a demonstration today!
